Highlights

Make a Million is a flexible team activity that sees attendees competing against each other. From the off, they are presented with a series of tasks that range from easy through to hard (some close, some far away) all with differing reward points. With careful planning they work out the best way to achieve their goal of making a million before the other teams.

Considerations

We publish a running total of points scored to keep up the competitive element. The activities offer a variety of skill and fitness levels to ensure there is something for everyone. We find that smarter teams do better than the fitter ones - but we don't tell them that.
