

# CHAIN REACTION

*Fantastic events that engage, motivate, challenge and energise your teams*

## Best Seller

### Overview

This fantastic challenge will see your teams create a piece of technological wizardry in the form of a perpetual motion chain reaction, starting with a unique energy form that transforms as it goes to create an explosive finale.

### Benefits

- Planning and communication
- Teamwork and cooperation
- Leadership
- Time and resource management
- Fun!!

### Summary

- Outdoor
- Minimum 120 minutes up to a full day
- Challenging
- 36 - 360 people

### Highlights

Each team is given a zone to work in and a whole heap of materials to create a chain reaction across their area - linking their contraption to the team before and after theirs. Frantic design, construction and testing leads to the final run. Will it all work and deliver the final crescendo? Only time will tell.

### Considerations

Chain Reaction can be adjusted to the themes of your day and can handle anything from 36 participants to over 300 attendees. We can make it as easy or as complicated as required; based around the needs and 'challenge level' of your group. We can also link this to resource and finance management by linking materials to costs and time penalties - to great effect.
